

IN CONSCIENCE, JULY 10, 2009.

The Unanimous Declaration Of Energy Independence

When in the course of human events, it becomes necessary for the People of Earth to dissolve the relationships, habits, and thought patterns that have bound us to an unsustainable energy paradigm, our conscience compels us to state our grievances with these outmoded systems, and to unanimously declare our intentions for the future of free energy.

We hold these Truths to be self-evident: that in our modern age, all means of energy production are not equal, some being polluting, limited, non-renewable and controlled by corporate-driven profit motives, while others are clean, abundant, sustainable, and able to be made freely available for the betterment of all people; that human innovation and creativity and has excelled beyond our current methodologies of energy production; that the current energy paradigm is ecologically unsound, economically unfeasible, socially divisive and morally bankrupt; that dependency on our current energy production methods has led to the increasing environmental degradation of our living planet, and to a growing systemic mentality of scarcity, lack, fear, aggression and imperialism; that free energy technology has been developed and suppressed for over a century and we need not be dependent on non-renewable energy for a moment longer; that the time is Now for us to develop means of energy production and distribution that utilizes the inherent abundance of Nature itself; that, as stated by the great scientist and inventor Nikola Tesla, science is but a perversion of itself unless it has, as its ultimate goal, the betterment of humanity; that whenever any energy model has been perpetuated toward a system of control, limitation, and the stagnation of humanity's collective evolutionary progress, it is the right and duty of the peoples of all nations to abandon the outmoded technologies upon which such systems are built, and transition toward those which are clean, renewable, sustainable, and free.

We, therefore, the Free People of Earth, in Good Conscience, assembled, appealing to the Supreme Order Of Nature for the manifestation of our intentions, do solemnly declare, that, in our lifetimes, through our continued dedication, ingenuity and inspiration, we will bring to fruition a New and Free energy paradigm, one in which empowering advancements in technologies are made widely and freely available to all peoples, in the service of human potential. And for the support of this Declaration of Energy Independence, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our Lives, our Fortunes and our Sacred Honor.
