### **Estimate of Situation**

#### **3rd Annual War Council (January 8, 2012)Index:**

**Problem**

**Facts**

**Course of Action**

**Discussion**

**Conclusions**

**Decisions**

## Action Items

### Our Mission

“...to discover, document, develop,  
demonstrate and disseminate natural solutions...”

### Problem

We the people are under multiple economic, political, health and food attacks, mobilized and supported by certain globalist elements in the government(s) and powerful policy-setting multinational corporations which are designed to reduce the population by up to 90 percent; this is the Globalist Genocidal Agenda.

We address this EoS to all the people of the world – knowledge is power! This document is especially addressed to all of you who know there are increasing risks of a genocidal nature that must be addressed. We acknowledge you and ask you to join us in this effort! Please share this EoS widely!  
[www.Twitter.com/HealthFreedomUS](http://www.Twitter.com/HealthFreedomUS): #OWS #TeaParty #C4L

The Facts Bearing on the Problem were Presented at the Natural Solutions Foundation's 3rd Annual War Councils. We heard from Judge Napolitano, the morning before the meeting, and at the meeting from Foster Gamble, producer of the movie Thrive, Tim Bolen, Dr. Hildy Staninger MD, Sharry Edwards, MEd, Jordan Rubin and various members of the public attending the meeting and simultaneous webinar.

## Facts

1) GMO's (Genetically Modified Organisms) have been declared by the US Government in the absence of any scientific justification or substantiation to be "substantially equivalent" to organisms' with their natural DNA. Therefore, according to the US FDA, no GMO label or identification is necessary; and, in fact, in the US it is illegal to label GMO products, including "GMO-Free" products. As a result, NO safety testing is required or permitted by the FDA even though, in fact, the modified and unmodified DNA are in no way truly equivalents. In addition, at least one GMO modification of corn has a gene ("Epicyte gene) added to it, which is explicitly designed to create sterility in both men and women through induction of antibodies to sperm. ALL independent scientific data makes it clear that GMOs are dangerous for the biosphere, the individual and future generations and are incompatible with non GMO life forms since their aberrant DNA is contagious and induces permanent, trans-generational mutations.

2) Multiple vaccines have been created and deployed to cope with such diseases as the swine and avian flu strains (H5N1, H1N1 viruses, also created in the laboratory and then made more virulent). These vaccines have then been made mandatory for increasing numbers of individuals. No vaccine, however, has ever been proven to be either safe or effective. Mandatory application to the public at large in the absence of such proof is both irrational and illegal since both are required by US law before a vaccine can be approved and marketed. Evidence exists indicating

that rather than preventing the disease they are supposed to address, vaccines actually cause disease and precipitate the pandemic or epidemic. Vaccines are an uninsurable risk known to cause foreseeable harm and are permitted in commerce only by special Act of Congress denying our common law right to redress for that foreseeable harm.

3) Radiation levels from Fukushima Daiichi continue to rise throughout the Northern Hemisphere, including the United State, but are not being monitored, at least for public dissemination. Measured levels, however, far exceed safe levels. Food, water and air are increasingly contaminated.

4) ChemTrails continue crossing the skies in many parts of the world dispersing toxic levels of metals such as (aluminum, antimony, arsenic, barium, cadmium, chromium, copper, iron, lead, manganese, nickel and zinc). In addition, reports exist of even more dangerous items like meson 'brain chips', genetically engineered mycoplasma, bacteria, viruses and self-replicating forms which can cause serious illnesses such as Morgellens Disease.

5) Unending war involvement described as "Anti-Terrorism" actually disguises the actual purpose of "protecting" oil resources. The real cost of this war is the loss of Constitutionally guaranteed rights (such as First Amendment, Fourth Amendment and other fundamental legal rights).

6) The "Principles of War" apply and provide the keys for developing proper strategies to correct the problems related to us at the 2010, 2011 and 2012 War Council meetings.

## Courses of Action (COA)

1. Disseminate the information regarding the systematic multiple thrust attacks supported by the globalists in the government and their partner corporations, which are designed to create illness in the entire population.

2. Provide simple, effective and replicable ACTIONS that every person can take to demand “Cease and Desist” orders from their elected officials at every level of government and impact corporate policy through citizen actions and choices which support sustainable citizen values and beliefs such as autonomy, reproductive and health rights, no involuntary experimentation, personal sovereignty, etc

3. Organize independent virtual social networking “Centers of Truth” whereby verified critical information and necessary “Action Items” sorted and stratified by subject matter can electronically reach vast numbers of the activated public in order to go on the offense and make sure that their elected official at all levels of Government hear the outcry, and withdraw their collusion with, and support for, genocidal programs and policies. This process has begun, with our creation of the Free World Network: [www.FreeWorldNetwork.org](http://www.FreeWorldNetwork.org)

4. Identify projects and initiatives which will enhance local autonomy, reproductive autonomy, improvement of health status for entire populations and similar efforts running counter to the globalist genocidal agenda

5. Raise necessary funding to support COAs #s 1, 2 & 3. Donate [HERE](#).

## Discussion

The US government has declared GMOs to be “equivalent” to natural genetic materials. Therefore, GMO product safety is assumed absent any long or short term safety testing. Because of this assumed “equivalency” between unmodified and GMO products, information/labeling is not required on labels, and is, in fact, forbidden in the US. This unjustified and highly biased (and dangerous) assumption has also been accepted by CODEX ALIMENTARIUS, the international organization responsible for setting guide lines and standards for everything that goes into your mouth except drugs. GMOs created to enhance nutrient contents of foods have been approved by CODEX even though, as stated in Appendix III of the BioEngineered Foods Guidelines, these foods may contain substances which are ineffective as nutrients, may be toxic and may be anti-nutrients. Appendix III states that large-scale human experiments are necessary to determine the impact of these GMOs despite the fact that experimentation without informed consent violates international law and principles.

Mounting evidence indicates that GMOs do not meet reasonable safety guidelines and in fact create serious health problems associated with the production of novel proteins when foreign DNA enters the nucleus of the cell. These problems include, but are not limited to, infertility, sterility, cancer, auto immune diseases, multiple organ system failure, spontaneous abortion across species, crop failure and famine, super pests and super weeds, loss of genetic diversity, trans-generational reproductive failure and more.

This raises serious suspicions regarding the US government’s initiative to prevent labeling of GMOs world-wide, since any gene could easily be introduced into the DNA of a GMO. For instance, at least one GMO corn modification has the Epicyte gene added to its DNA structure which creates sterility in both men and women and is, like all other GMOs in the US, totally unlabeled. The acceptance of

presumed substantial equivalence violates the common law's "strict liability in tort" for offering products that can cause harm, and various legal codes' "Precautionary Principle" that those who support the introduction of novel products bear the burden of proving safety. The FDA, instead of protecting the population, accepts statements of equivalence from manufactures without any investigation or testing.

Consumers can enjoy the GMO sweet corn and then regret every kernel since they may have been irreversibly sterilized without informed (or any other) consent. Since corn forms the raw material substrate for a vast array of food components, and since all such substrates and substances are unlabeled, there is literally no way for the consumer to protect him/herself from this threat.

Additionally, corn is hardly the only GMO in the food supply: soy, beets, papaya, wheat and a rapidly increasing array of crops and animals are GMO.

Animals consumed by humans who have consumed GMO feed are also GMOs, passing their genetic taint on to those who consume them, just as plants do.

Unlabeled GMO materials are found in nearly all processed and an increasing amount of unprocessed food.

Vaccines allegedly exist only to provide protection for the population against diseases that have the potential to become epidemic and spread through the population rapidly and devastatingly. This concept sells easily to the general public despite a total lack of scientific evidence or support for it. However, suddenly we find ourselves confronted by a flurry of new diseases such as Avian

Flu, Swine Flu, SARS, et al that require vaccinations for the entire US population (plus many other countries). Increasingly, “diseases” like cancer, smoking, depression, anxiety, diabetes, aggression, anxiety and many others are the object of “preventive” and “therapeutic” vaccines now in development.

Mounting evidence indicates that Avian Flu, Swine Flu, SARS were created in laboratories for the express purpose of providing an excuse to vaccinate large populations with vaccines that include such dangerous ingredients as genetically engineered viruses, mercury, aluminum, formaldehyde, polysorbate 80, human DNA from aborted fetuses, cancer viruses like SMV40 and antibiotics for example. In addition to injecting known toxins into vulnerable systems (including fetues, infants and young children) , vaccines actually cause the diseases they are supposedly targeted against instead of preventing them.

In addition, because vaccines cause and potentiate the later development of serious (and highly profitable) chronic diseases such as autism, cancer, diabetes, neurological diseases, as well as infertility, the “after-market effect” of vaccine is very powerful and well-understood by the crony corporatists and their allies in the regulatory agencies.

Avian Flu strains were created when a benign commensal virus was intentionally mutated in a 6 year program funded by the National Institutes of Health by adding the lethal 4-gene sequence which gave the 1918 flu pandemic its enormous lethality. This highly lethal GMO virus was, however, not easily transmissible until its recent re-engineering in two labs (US and Netherlands). These well-funded successful efforts to re-engineer the Avian Flu virus for both high transmissibility and high lethality, correcting the “problem” of the earlier version’s lack of high transmissibility, bring the existence of a genocidal intent into stark focus.

When the new Avian Flu is re-engineered and released (under a new name) another mandatory vaccine will follow close behind creating vast genocidal harm.

Radiation from the Fukushima nuclear reactor disaster continues to contaminate the entire globe with no indication of any controls in the foreseeable future. The stark reality is continuing, and continually increasing, radiation poisoning for not only all animal life (including human life), but also for all plant life. This means that ALL the food we eat and ALL water we drink either does or will contain radiation poisons that vary with location and weather conditions and will continue to get worse over time for eons. It would appear that governments do not want the public to know how bad the situation really is. Otherwise, they would continue to monitor the situation and report the conditions similar to weather reporting. In broad terms, however, the Northern Hemisphere is in more serious jeopardy than the Southern Hemisphere. The Western and Northwestern US is more radioactive than the Southeastern US although this distinction is rather meaningless since a vast proportion of the food supply of the entire US comes from the West and Northwest of the US. A personal Geiger-Counter can help with individual selection of foods with minimal radiation to put on your personal table if it is an advanced model capable of determining the presence of the trans-uranium elements plutonium, americium, etc. Conventional Geiger Counters are not able to do this.

All food grown and consumed in the US is grown in increasingly contaminated areas and then shipped long distances to the consumer. Since the adoption of the misnamed FDA "Food Safety" Modernization Act by the 111th Congress, agency attacks on local and natural food sources has escalated. Examples include the coordinated raids during 2011 on the Amish Raw Milk Dairies and the California Rawsome Co-Op.

In addition, strong documentary evidence indicates that the US HAARP system was pulsing 2.5 Hz into the Fukushima earthquake epicenter for four days prior to the earthquake that resulted in the destruction of the multi-reactor nuclear plant there. The frequency most associated with earthquakes is 2.5 Hz. Earthquakes can be induced through such pulsation of sufficient energy. HAARP operates at sufficient energy levels to produce such large-scale effects.

Nuclear power is alleged to have provided a major contribution to fulfilling the energy needs for many different populations, despite serious questions about that allegation. However, not even the most ardent proponents of nuclear power can deny its many safety problems, including the absolute lack of any safe way of dealing with the nuclear waste, most of it radioactive over vast time periods. Safe, clean, non-fossil fuel, non-nuclear energy alternatives exist. These alternatives (including, but not limited to, Zero Point Energy - ZPE) can provide huge energy resources. Research will reveal whether the ZPE can match the nuclear capabilities or not. Research to determine the necessary improvements to the long-suppressed ZPE technologies must be made to the ZPE modernization effort to compete with and replace nuclear and fossil fuel use. Nuclear power, like vaccines, is an uninsurable economic risk.

Chemtrails may, if we do not recognize them for what they are, appear innocent and of no consequence in the skies above us ... nothing more than the contrails from any high flying airplane under certain weather conditions. That is the myth. The facts, however, are very different.

High flying planes are loaded with substances (allegedly for weather modification) designed to poison large populations, and vast amounts of soil and water, around the world. Analysis by various laboratories in various location before and after Chemtrail spraying show that many toxic metals such as aluminum, antimony, arsenic, barium, cadmium, chromium, copper, iron, lead, manganese, nickel, and

zinc are included in the Chemtrail mixtures which ultimately fall to earth. We breathe and ingest the toxic particles into our body. Self-replicating materials, mesons and nano communicators are also part of the toxic brew sprayed on us without our consent or agreement. Conditions like Morgellon's Diseases are among the results. Meson penetration can lead to cancer and other immune-related diseases.

Aluminum is highly toxic to the body. Arsenic is a deadly poison. Lead, likewise, is a poison, as are beryllium, nickel, cadmium and other components of Chemtrails. On the assumption that they are being sprayed for weather modification, what makes any of these metals acceptable as environmental contaminants for weather modification vs human destruction? When Chemtrail spraying is intense, emergency room admissions go up in urban areas by approximately 14%. Deaths from respiratory and cardiac causes rise by a similar rate of increase. The lethality of Chemtrails is far from theoretical.

Another interesting data bit is that Monsanto is developing GMO crops that grow in soils with high aluminum content. That fact points strongly to a cabal directly related to the Chemtrail menace.

In addition to the metals mentioned above, evidence now indicates that there are also tiny mesogen brain chips included in the Chemtrails. These can lodge in the ears, the nasal cavity, the brain or in the skin. Over 100 persons analyzed for these chips had symptoms similar to Morgellens disease. Nano communicators or "smart dust" is likewise included in the toxic brew of Chemtrails as well as biologically novel organisms (bacteria, mycoplasma and viruses).

Some of the mesogen chips contain a silicone side chain with a NH<sub>4</sub> ion capable of creating an electrical charge, apparently involved in the nano-communication capacities of the mesogens. When the body rejects these foreign materials, cancers are sometimes the result. Other results are, according to the presenters at the War council, as yet, uncharacterized.

Unending involvement in endless WAR provides an unending excuse for suppression of information and constitutional rights. Since the failed 9/11 cover-up with its improbable and obviously false official story, increasing suppression of rights has taken place, with repeated assaults on protection of the citizens from the intrusion of the government.

The extension of public safety to public suppression with indefinite “preventive detention”, cancellation of citizenship and rights to legal protections upon vaguely stated “suspicion of terrorist sympathy” or “material support of terrorism” rips away even the pretense of justice as a framework for our society.

## Conclusions

1) Numerous Government-supported thrusts target the population to create illness first, followed by “social apoptosis”, programmed large-scale death, consistent with the globalist depopulation/genocidal agenda as suggested in Henry Kissinger’s National Security Study Memorandum 200, November 10, 1974.

2) Most of the population does not know (or believe) that “its own government” would attack its own population. Certain groups in the population on both the right and the left [identified with both #Occupy Wall Street and the Tea Party, for

example] do not trust Government not to take such actions and the number of people who distrust Government appears to be at an historical high level. This means that the possibility of mobilization for change on a peaceful, productive basis is enormous if properly motivated.

3) Responses to complex, interconnected problems must, none the less, offer effective, comprehensible and simple solutions which will make a major difference in the situation. Such solutions can then be turned into effective and easily multiplied “Action Items” sent via email and other easily used means so that huge numbers of respondents can easily and quickly “Take the Action” and become part of the millions of voices needed to create the “Mass” that the Government will hear to compel policy change.

The Foundation has proven repeatedly that mass Push Back by an aroused population will force the globalists to reverse course, at least temporarily. Our 2009 success with the Swine Flu Vaccine Panic, where over 3.5 million messages to decision makers, coupled with mass vaccine refusal, stopped the planned pandemic, is an example that was discussed at the War Council.

## Decisions

The following list contains the essential aspects for each individual’s actions. Each respondent can select those “Action Items” that they agree with and support and push the appropriate button(s) ...OR... (as we develop the capacity) they can select the “ALL” button and complete the action in a single stroke.

Current Action Items can be found at: <http://tinyurl.com/PushBackHere>.

## **ACTION ITEMS**

**1) Demand an immediate Government moratorium on all foods or other products containing any GMO ingredients sold in the US or abroad until independent, non-industry-related safety testing proves that each GMO product and GMO-derived product is, in fact, safe for human consumption. <http://tinyurl.com/No2GMO>**

**2) Demand similar changes for labeling requirements accepted by CODEX. [http://salsa.democracyinaction.org/o/568/p/dia/action/public/?action\\_KEY=2049](http://salsa.democracyinaction.org/o/568/p/dia/action/public/?action_KEY=2049)**

**3) Demand a reevaluation of national and international organic standards to bring them into meaningful conformity with public expectations., while protecting local and organic food sources from stifling Federal Regulations: <http://tinyurl.com/StateFood>**

**4) Demand that FDA leave our supplements alone! <http://tinyurl.com/SaveOurSupplements> - <http://tinyurl.com/healthfreespeech>**

**5) Demand an end to Federal Food Control. Support the Raw Milk Freedom bill; the FDA raw milk ban is a symbol and a symptom of all that is wrong with Federal Food Control: <http://tinyurl.com/RawMilkFreedom>**

**6) Demand a Government reevaluation of public policy on vaccines in any form and reject all forms of forced drugging and treatment:**

<http://tinyurl.com/NoForcedDrugging> .

**7) Demand a total Government moratorium on ALL current and future vaccines until completion of the Government reevaluation of vaccine public policy ...AND... until each and every vaccine has passed both safety and effectiveness testing; without using the population as human Guinea Pigs.**

<http://tinyurl.com/noforcedvax>

**8) Demand that the Government set up selective radiation monitoring stations (a minimum of 1 per state) around the country and advise the public of the present and growing dangers as Fukashima continues to emit radiation with no immediate end in sight.**

[http://salsa.democracyinaction.org/o/568/p/dia/action/public/?action\\_KEY=5731](http://salsa.democracyinaction.org/o/568/p/dia/action/public/?action_KEY=5731)

**9) Demand that the Government eliminate all nuclear power and permit major research into “Zero Point Energy”, which provides a safe and effective alternative. End all government subsidy to fossil fuel programs. End all offshore oil drilling immediately.**

[http://salsa.democracyinaction.org/o/568/p/dia/action/public/?action\\_KEY=5731](http://salsa.democracyinaction.org/o/568/p/dia/action/public/?action_KEY=5731)

**10) Demand an immediate “Cease and Desist” order for ALL “Chemtrail spraying /releasing and make full disclosure on the ingredients contained in the effluent public.**

**11) Demand a total moratorium on Chemtrail spraying.**

12) Organize “Centers of Truth” designed to bring true facts to the widest possible public attention (electronically by subject) regarding various government and corporate genocidal programs. [www.FreeWorldNetwork.org](http://www.FreeWorldNetwork.org) .

13) Demand the continued Constitutional protections of “Free Speech” and other Bill of Rights protections. <http://tinyurl.com/PushBackFree>

14) Support the Natural Solutions’ Fund for Natural Solutions. This investment opportunity allows us to support all of the efforts to keep us healthy, alive and aware by creating an opportunity to make a profit on these critically important investment opportunities. (See [www.FundforNaturalSolutions.org](http://www.FundforNaturalSolutions.org)).

Initial Estimate of Situation Video: <http://youtu.be/3LHAwgq8Hwk>

Prepared by Maj. Gen. Bert Stubblebine (US Army, Ret)

President, Natural Solutions Foundation

January 31, 2012
