Important Terminal Commands For macOS

• To turn off Apple’s GateKeeper “security” feature:
  
  ```
sudo spctl --master-disable
  ```

• To prevent GateKeeper from re-arming:
  
  ```
sudo defaults write /Library/Preferences/com.apple.security GKAutoRearm -bool NO
  ```

• To ad-hoc code-sign an application:
  
  ```
sudo codesign -f -s --deep /Applications/AppName.app
  ```
